PROFESSIONAL SUMMARY

As a Frontend Development Engineer (FDE), I excel in creating user-friendly interfaces and integrating REST APIs. I leverage Python for efficient data structures and algorithms. Committed to innovation and continuous learning.

TECHNICAL SKILLS

Technologies

- Python,
- TypeScript ,Javascript
- SQL, MongoDB, MySQL

Frame Work / libraries

- Angular, Reactjs
- Framer , NPM , Tailwind css
- Django | python : 3.11.1

Developer Tools

- GitHub, GitLab, Google
- VS code , Visual Studios
- MonogDB Atlas, SQL server

PROFESSIONAL EXPERIENCE

Software Engineer

May 2023 - Dec

As a Software Engineer at **Kranium Technology**, I specialize in web application development with a focus on seamless third-party integrations using Angular and Core PHP. I excel in REST API development, including secure JWT token authentication for efficient database access. Notably, I delivered a Tally web application within a month, resolving client issues effectively. I also developed a flexible solution for data porting, integrating with Zoho Books for JSON bill generation, improving workflows, and enhancing data management capabilities. My contributions extend to creating REST APIs for client integrations and internal data communication, showcasing my commitment to innovation and efficiency in software development.

Junior Developer

Dec 2023 - present

As a Junior Developer at **Svarm**, I'm actively engaged in web application development and application development projects. Leveraging my previous experience and skills, I contribute effectively to the team's objectives. Notably, I've been instrumental in delivering high-quality solutions, ensuring seamless functionality and user satisfaction. My passion for innovation drives me to continuously learn and improve, enhancing both my individual contributions and the overall success of our projects.
